

Cloud Storage Solutions

Enable data back-up & disaster recovery services with private cloud infrastructure.

Your data is your business' lifeline. Without constant access to your company's data its workflows could falter and force processes to come to an abrupt halt. The growing threat of cyber attacks and the potential for a natural disaster puts your physical infrastructure at risk, making permanent data loss a likely possibility. You need to ensure your data is protected and available at all times. Powernet's cloud storage solutions enable you to fulfill this need.

Our flexible cloud storage solutions ensure your data is protected and highly available through cloud based infrastructure that is fully managed by our certified engineers. This allows your company to upload and utilize data in the cloud without the headache of managing additional infrastructure. With industry leading back-up & disaster recovery software in place, you can rest assured that your data will always be safe, secure and available to you in the event that local data was damaged or lost.

Private Cloud Hosting

Avoid the hassle of managing physical servers. With our private cloud offering you can shift your resources to the cloud and utilize back-up & disaster recovery services to their fullest. Private cloud hosting provides a safe, fully managed environment for your data. Have peace of mind that your cloud infrastructure is scaled precisely to your needs so you never pay for more than you use.

Data Back-up

Back-up as a Service (BaaS) allows businesses to automate processes that routinely upload data to a secure cloud storage environment. Data housed within the cloud is safe and easily accessible. Our secure cloud back-ups allow you to...

- Minimize downtime
- Avoid data-loss
- Archive data
- Reliably restore lost data

Disaster Recovery

Disaster Recovery as a Service (DRaaS) ensures your data never falls victim to ransomware, hardware failure or natural disaster. Through our secure cloud based environment, your data back-ups are ready for use in the event of data loss. With streamlined failback and recovery assurance features in place, you can rest assured your data will always be available when you need it.

About Powernet

Powernet enables businesses to connect with audiences in the office and across the world through wireless networking, Wi-Fi, voice, data, IT managed services, in addition to domestic and international carrier services.
